Your Cyrus Rugged phone is able to permanently stand a dive of up to 1m. Of course, your Cyrus Rugged smartphone is also protected against rain, running water, snow, water vapor, and other water related impacts.

Extreme contaminations caused by dirt or mud as well as severe dust impacts are not able to harm your Cyrus Rugged phone. Thanks to the IP68 standard dirt can't enter the inside of the case. Instead you may even clean off contaminations with running water.

Your Cyrus Rugged phone is capable of withstanding a 1,5m drop. Dropping your phone from this height can damage neither electronics nor technics. The specially designed plastic housing deflects the kinetic energy.
